Gradient System

Primary → Secondary

Secondary → Accent

Primary → Accent

Use gradients sparingly. The Primary→Secondary gradient is preferred for hero sections and story backgrounds. Always at 135° angle.

Usage Do's & Don'ts

✓ Do	✗ Don't
Use the specified fonts at the given weights	Substitute fonts not in the brand system
Maintain minimum logo clear space	Place the logo on busy or low-contrast backgrounds
Use the spacing scale consistently	Use arbitrary spacing values
Apply gradients at 135° with brand colors only	Create new gradients with off-brand colors
Keep text within safe zones on all formats	Push text to edges or outside safe areas
Use the Secondary color for accent elements	Overuse the accent color as a primary
Maintain consistent border radii per token	Mix rounded and sharp corners on the same layout
